Chair Trust—What Next?

New York and Chicago promoters have undertaken to organize a trust that will take in all of the big chair manufacturing establishments of the United States. It is announced that the trust, if it is formed, will be capitalized at \$50,000,000 or \$60,000,000. The plan is to buy out the larger chair manufacturing establishments.

The Eagle, King of All Birds,

Is noted for its keen sight, clear and distinct visions. So are those persons who use Sutherland's Eagle Eye Salve for weak eyes, styes, sore eyes of any kind or granulated lids. Sold by all dealers at 25 cents.

Auditor Sam H. Stone, of Madison county, is an out and out candidate for Governor. The announcement is public, and it is given out that Stone and Taylor will combine to defeat Pratt. Stone and Taylor will represent the Administration wing, and Pratt, Bradley.

Jesse Halman, of Bradner, O., and T. A. Hunter, of Marion, O., will start in a few days on a tour around the world on bicycles.

ENGLAND'S QUEEN.

Her Eightieth Birthday Observed on Wednesday.

Celebration of the Event at Windsor Castle and Throughout England.

MCKINLEY SENDS GREETING.

Torrents of rain ushered in Queen Victoria's eightieth birthday on last Wednesday.

At Windsor, where a general holiday was being observed, the town, was decorated with flags and the church bells were rung at 11 o'clock in the morning.

The weather cleared at about 11 o'clock, and a serenade by the Windsor and Eton Amateur Choral Societies was given in the grand quadrangle of Windsor Castle. The Mayor and corporation of Windsor, in their full robes of office, and the Borough Magistrates were also present.

The scene was extremely picturesque. The Queen, looking to be in excellent health, came forward and bowed repeatedly.

Her Majesty afterward knighted the Mayor, J. T. Soundry. Although the official birthday celebrations in London were postponed until June 3, all public buildings, many business houses and a great many private residences were decorated. In fact, more flags were flying than at any time since the Queen's Jubilee.

A great congregation assembled in St. Paul's Cathedral in the morning, where thanksgiving services were held, and huge crowds of people were unable to obtain admittance, and grouped themselves in the spaces about the building.

The birthday celebration occurred throughout the provinces, the ships in the different ports were "dressed" for the occasion and the warships were covered with bunting.

At Portsmouth there were reviews of the regular troops.

A telegram from Simla, the summer capital of British India, records that impressive Queen's birthday services were held there.

Dispatches from the Continent report the printing of eulogistic articles on the Queen's reign in the European press.

PRESIDENT MCKINLEY SENDS GREETING.

The President has addressed the

following message to Queen Victoria on the occasion of her birthday:

Washington, May 24.—Her Majesty, the Queen, Windsor Castle, England.—Madame: It gives me great pleasure to convey on this happy anniversary the expression of the sentiments of regard and affection which the American people cherish toward your Majesty and to add the assurance of my own cordial respect and esteem. May God grant to your Majesty and to the countries under your government many years of happiness and prosperity.

WM. MCKINLEY.

No Corporation in His.

The Winchester, Ford and Richmond Telephone Company struck a snag at the outset. Joe A. Willis has secured an injunction to prevent the company from digging holes or erecting its poles along his line on the Boonesboro pike. He says he has no particular objection to the Company as individuals, but he doesn't like corporations and doesn't propose to grant any concessions to them.—Winchester Democrat.

While he was getting the injunction the poles were put up.—Ed.

Something in the Tone.

"That boy of mine," said the angry father, "is just a natural born fool."
"Of course," returned the neighbor, and there was that in his tone that made the father want to climb the fence and go after him.—Chicago Evening Post.

Wise in His Generation.

"Are you sure," asked Brutus, "that this oration of yours will get the publicity it deserves?" "Oh, yes," replied Antony; "I've given Shakespeare a printed copy of my remarks."—Philadelphia North American.

A convict pardoned by Acting Governor Worthington recently has fallen heir to \$1,400,000. He was an Englishman and was sent up from Louisville for obtaining money under false pretenses, about three years ago.

AN AUTOMOBILE HERE.

First of the Horseless Carriages Is in the City.

The first automobile to be permanently located in this city is now housed in the stable in the rear of 2021 Maryland avenue and is being exhibited by its maker, Mr. W. Lee Crouch, of New Brighton, Pa. He hopes to interest Baltimore capital in manufacturing carriages on his patents and has already associated with him Mr. D. A. Clark, of this city. The automobile arrived in this city yesterday and a spin was taken out the road during the evening. Today it will travel around the vicinity of Roland Park and the swift, mysterious movements of the horseless carriage have attracted crowds of curious spectators.

The automobile now in Baltimore has seats for two, though another couple can easily be accommodated. It is painted black except the broad panels in the sides of the body, which are cherry. Little machinery is visible. In front the most conspicuous object is a pair of bicycle handle bars, somewhat larger than those on the smaller vehicles. Upon the bars is fastened a bell to warn away danger. Against the dash-board are placed two gauges, showing the air and steam pressure. A water indicator tells how much of the fluid is in the reservoir concealed in the rear of the body. A small foot-brake and a lever to cut off steam are the only other pieces of mechanism visible except two screw valves which operate to cut off the supply of steam and oil.

The motive power is superheated steam. Mr. Crouch, the inventor, says he can expand this agent to a much greater degree than by the ordinary engine and thus can generate his means of propulsion very cheaply. Common kerosene oil or gasoline is used and horse power is developed with less than 20 pounds of water. The reservoirs will hold 20 gallons of water and 10 gallons of oil. The total horse-power of the automobile is 12, and Mr. Crouch says the heaviest grades are climbed with ease. A run of 40 miles was taken yesterday, during which 20 gallons of water and 3 1/2 of oil were consumed.

One of the clever appliances of the machine is a long hose which connects with the reservoir and engine in such a way that should the water supply get low while on the road, it is only necessary to get within 12 feet of the water supply, drop in the hose, turn a valve and the engine pumps the reservoir full in a few minutes.

The mechanism concealed under the body of the automobile is an arrangement of axles, gears and driving chains, reminding one of the now old-fashioned tandem bicycles. Of course it has pneumatic tires and the machine bowls along the country roads at a speed of 25 miles an hour.—Baltimore News, April 14, 1899.

The maker of this machine, Mr. W. Lee Crouch, was born near White Oak, Bath county, and at the age of 10 years moved with his family to Hillsboro, Fleming county, where he was dissatisfied and ran away from home, going to Cincinnati, where he went to work in an electric light house. Since that time he has been identified with the inventors of the age. May he meet with deserved success.

Wanted.

I want to buy 20 yearling red-poll heifers. W. F. HIBLER, 40-1f Mt. Sterling, Ky.

It is estimated that 500 saloons in Baltimore will close their doors as the result of the determination of the Maryland Brewing Company to abandon the practice of paying for licenses.

MUST KEEP 'EM.

Admiral Dewey Says Anti-Expansionists

Will Be Regarded as Curiosities In Years to Come.

KEY TO ORIENTAL COMMERCE.

A dispatch from Hong Kong quotes Admiral Dewey as saying on board the Olympia:

"The courtesy of these visitors I warmly appreciate, but I am too much worn out and sick to receive them. I am not sorry to leave Manila at this time. I could not stand the care and responsibility much longer. It is vastly easier sometimes to be under orders than issue them.

"It is the responsibility that kills. During the year that has elapsed since we came to Manila, I have not had one sick day until now. A year is long enough in this climate for an old man and I am glad to be permitted a rest. On this account I expect to remain in Hong Kong two weeks. That ought to recuperate me. My intention is to spend the time at Victoria Peak, where I hope to be absolutely free from worry. Nobody is more sensible of the kindness of the people who have extended me invitations, but I do not wish entertainment. My health will not stand it at present. Two weeks of perfect quiet at the peak ought to make a new man of me.

"I have the greatest enthusiasm in the future of the Philippines. I hope to see America's possessions the key to Oriental commerce and civilization.

"The hands of our great country will develop the agricultural and mineral richness of the islands.

"We must never sell them. Such an action would bring on another great war. We will never part with the Philippines, I am sure, and in future years the idea that anybody should have seriously suggested it will be one of the curiosities of history.

"The insurrection is broken. There will be no more hard battles and the new era for the islands that was temporarily delayed by the rising will soon begin. Aguinaldo and his generals must be captured and then the very semblance of insurrection will cease. Aguinaldo is the real power among the natives. Wherever we go it is always Aguinaldo. The officers of the Tagalos, civil and military, tell us they have no power to treat for peace until they hear from Aguinaldo. Foreigners and natives testifying before the peace commission all testify to the same state of facts.

"Many of the island provinces that were once warlike, are anxious for peace and will accept the American terms as soon as the Tagalos of Luzon are whipped into line, but they dare not treat with us as long as Aguinaldo has the power to confiscate property or punish those who offend him.

"The end is not far off, if we push right after them. We must concentrate our troops and vigorously prosecute the campaign in Luzon. That is our whole task. The southern islands will soon fall in line. This, I hope, will not be long happening.

"The Olympia will go home leisurely. I want my officers and men to get the greatest benefit of all the stops we make. We will pick our places with this in mind. They have earned a rest by a year of steady duty without respite.

"While I am glad to be going home, I cannot say good-bye to Manila without regrets. There have been many pleasant occurrences among the months of harassing responsibility and we shall not forget them."

A SMALL SPOT MAY BE CANCER.

MOST VIOLENT CASES HAVE APPEARED AT FIRST AS WERE PIMPLES.

The greatest care should be given to any little sore, pimple or scratch which shows no disposition to heal under ordinary treatment. No one can tell how soon these will develop into Cancer of the worst type. So many people die from Cancer simply because they do not know just what the disease is; they naturally turn themselves over to the doctors, and are forced to submit to a cruel and dangerous operation—the only treatment which the doctors know for Cancer. The disease promptly returns, however, and is even more violent and destructive than before. Cancer is a deadly poison in the blood, and an operation, plaster, or other external treatment can have no effect whatever upon it. The cure must come from within—the last vestige of poison must be eradicated.

Mr. Wm. Walpole, of Walshtown, S. D., says: "A little blotch about the size of a pea came under my left eye, gradually growing larger, from which shooting pains at intervals ran in all directions. I became greatly alarmed and consulted a good doctor, who pronounced it Cancer, and advised that it be cut out, but this I could not consent to. I read in my local paper of a cure effected by S. S. S., and decided to try it. It acted like a charm. The Cancer becoming at first irritated, and then discharging very freely. This gradually grew less and then discontinued altogether, leaving a small scar which soon dropped off, and now only a healthy little scar remains where what threatened to destroy my life once held full sway." Positively the only cure for Cancer is Swift's Specific—

S. S. S. FOR THE BLOOD

—because it is the only remedy which can go deep enough to reach the root of the disease and force it out of the system permanently. A surgical operation does not reach the blood—the real seat of the disease—because the blood can not be cut away. Insist upon S. S. S.; nothing can take its place. S. S. S. cures also any case of Scrofula, Eczema, Rheumatism, Contagious Blood Poison, Ulcers, Sores, or any other form of blood disease. Valuable books on Cancer and Blood Diseases will be mailed free to any address by Swift Specific Company, Atlanta, Georgia.
